AUO	Assessment Method	Reporting Year	Result	Conclusion	Data Evaluation	Action Plans
AUO #3 - Community Partnership	Inventory of partnerships, enrollment in classes from community partners' membership	2024 - 2025	5 UDW members enrolled in Fall 24 and 11 are enrolled in Spring 25	Target Met	We are making great progress with our UDW membership, and originally anticipated in having a few enrollment in the Spring, so we have exceeded our expectations with Fall enrollment and current Spring enrollment.	We will continue to follow u with UDW leadership to understand needs of their members and host orientations and workshops promote noncredit offering
AUO #1 Enrollment	We will utilize enrollment data at census					
AUO #2 - Efficiency	We will utilize fill rates at census	2024 - 2025	Fall 24 census fill-rate was at 82.4%, which is slightly lower than last Fall at 84%	Target Not Met	The division is attempting to bring more classes back in person and is seeing a dip in fill-rate as we kept some lower enrolled classes. That said, we did offer some LCF classes to offset the lower enrolled classes. It should be noted that the average enrollment per section is still at 28 per section between Fall 24 and Fall 23.	Working closely with Promotions and Counseling advertise and promote in-person classes.
